FRIDAY-SATURDAY, JULY 2 and 3

MONTE BLUE and DOROTHY DEVORE
in

"THE MAN UPSTAIRS"

A romance of London—with thrills, laughs and
mystery—The story of a mischievous prank that al-
most culminated in disaster.

MONDAY-TUESDAY, JULY 5 and 6

At time of going to press the management is unable
to announce the name of the picture for above nights,
but assure patrons of a first class show.

Shows start at 8.30 p.m. Regular prices.

U. F. A. Government Returned

Proudfoot Easy Winner in Acadia

Ross, Minister of Public Works, Meets Defeat

The U. F. A. government
were swept into power again
in Monday's general election
with about the same majority
as it enjoyed during the past
five years. All ministers, with
one exception, were returned
to office. Hon. Alex. Ross,
minister of public works, lost
as a labor candidate in Calgary.
A. A. McGillivray, conserva-
tive leader, had an easy victory
in Calgary, being the only can-
didate to be elected on the first
count.

Hon. J. F. Lyburn, new
attorney-general, headed the
poll in Edmonton.

Lorne Proudfoot, U. F. A.
member of this constituency
(Acadia) had an easy victory.
With 15 polls still to have from
the count stands Proudfoot,
1767, Kerr, conservative 509,
Campbell, liberal 358. Camp-
bell loses his deposit.

Calgary elected 2 conserva-
tives, 1 liberal, 1 labor and 1 in-
dependent. McGillivray and
Irwin, conservatives, went in
on the first and second counts,
respectively. Webster, liberal,
went in on fifth count, Parkyn,
independent, and White, labor,
went in on the tenth count.

J. T. Shaw, Liberal leader,
goes to a second count with
Hon. P. H. P. U. F. A. in Bow
Valley.

Final returns at time of go-
ing to press are: U. F. A. 37,
Liberal 5, Conservative 3, Lab-
or 3, Independent 1. In the 11
remaining ridings U. F. A. lead
in 4, Liberals in 5, Labor in 1,
a doubtful seat in Edmonton
will probably go conservative.

Fifth Fortnightly Crop Report

Issued by Department of Agriculture
Edmonton, Alberta, June 29.

Since last report, great im-
provement has been brought
about in the crop conditions in
the southern districts by rains
which in most of these districts
were quite heavy, and were
general over the entire south
in varying degree. Though
these rains came somewhat too
late to bring about a complete
recovery of the crop which had
already suffered from high
winds and lack of moisture,
the large percentage of grain
aerage in the south now gives
promise of a good average crop.
There is uneven germination
over a considerable area due to
the activities of the cutworms,
and to dry conditions, but the
situation on the whole, in the
southern districts, is much
more promising than a fort-
night ago, with the summer-
fallow crops and late sown
grain looking very well.

Throughout Central and Nor-
thern parts the crop outlook is
very satisfactory. There has
been sufficient moisture at all
times and although the weather
has been somewhat cool the
crop is a splendid color and
well advanced for this time of
year.

Speaking generally, the wheat
crop is coming into the shot
blade, with the early grain in
southern districts heading out.
The prospects are for an early
harvest.

Prospects in the dairying in-
dustry are reported to be
brighter than last year, with a

King Government Resigns

Meighen Sworn in as Premier

Following the resignation of
the King Government on Mon-
day, Right Hon. Arthur Meigh-
en was sworn in as prime min-
ister of Canada, at 11 a.m. yes-
terday. At the same time Sir
Henry Dwyton, Hon. H. H.
Stevens, Sir George Preley,
Hon. Hugh Guthrie, W. A.
Black, M.P. of Halifax, and
Senator W. D. Ross, conserva-
tive leader in the senate, were
sworn in as ministers without
portfolio, to carry on until a
regular cabinet is formed.

School Closes To-day for Summer Holidays

The last of the departmental
examinations, in which grades
VIII and X participate, will be
over to day and school officially
closes for the summer holidays,
this afternoon.

Reduced Postage Goes Into Effect, July 1

The following are the new
letter rates effective July 1.

Canada for local delivery—2
cents for the first ounce and
one cent for each additional
ounce.

Canada (except for local de-
livery), United States, New-
foundland and all other places
in the North American Contin-
ent—2 cents for the first ounce
and 2 cents for each additional
ounce.

Great Britain and all other
places within the Empire (ex-
cept the North American Con-
tinent)—3 cents for the first
ounce and 3 cents for each ad-
ditional ounce.

Other Countries—8 cents for
the first ounce and 4 cents for
each additional ounce.

There is no change as regards
the rate on post cards.

Oyen Wins from Chinook in Last Innings of Ball Game

The Chinook ball team visited
Oyen last Wednesday after-
noon, and after leading through-
out the game, lost out in the
last innings, when their pitcher
unable to hold control, filled
the bases with no one out.
With this situation the local
boys injected the necessary pep
into the game to come out on
the long end of the score.

The game was played erratic-
ally with the visitors showing
to best advantage in the field.

The final score was Oyen 6,
Chinook 5.

Lumber Output for Alberta

According to the dominion
year book, just issued, the total
lumber output for Alberta dur-
ing 1925 was valued at \$841,000,
a total of 32,700,000 feet of lum-
ber was cut.

promise of increased product-
ion.

Alfalfa cutting is in progress
in the south, with a good crop
being taken off.

Summer Fair Special

The Robin Hood Mills, Ltd., offers through S. A.
Miller, their Oyen distributor for the best loaf of
bread baked by non-professional, with Robin Hood
flour: First Prize, one 40 lb. sack Robin Hood flour;
Second Prize, one 40 lb. sack Robin Hood flour.
Dealers sale's slip showing purchase of not less than
one 40 lb. sack of Robin Hood flour, within three
weeks of date of contest, to be attached to exhibit.

Ladies, this is a good Special. Make an en-
try in this competition. Win a Prize, and
help the Oyen Fair.

Preserving fruit season is now on. Phone us for
prices.

Store closed each Wednesday afternoon during
June and July, except Wednesday, June 30.

WESTERN CANADA GOOD FIELD FOR OVERSEAS TRADE

Montreal.—Canada, admittedly the most difficult field in the British empire for the export in British exchange of stiff competition, is commanding increasing attention among manufacturers across the water, and more firm principals personally are visiting the Dominion preparatory to marketing British goods here. A. E. Polard, new British trade commissioner for Western Canada, declared here.

Mr. Polard, who for the past five years has been in charge of Canadian affairs in the overseas department of the British Board of Trade, is en route to Vancouver, where he will establish headquarters. He follows J. B. Beale, who has been transferred to New Zealand.

"Western Canada, perhaps, offers a better field for the exporters in British."

"Out west we have a finer chance. The Panama Canal route has given us a cheap haul to the Pacific coast and the British preferential tariff aids us. Results are most encouraging."

Censorship Of Reading Matter

Women's Press Club to Offer Co-operation With Daily Newspaper Association

Toronto.—Much of the crime among youth of Canada might be eliminated if anxious literature could be banned from circulation. Judge Emily Murphy, Edmonton, said before the triennial convention of the Canadian Women's Press Club. Judge Murphy was speaking in support of a resolution brought in by Miss Mary Amelia Smith of Calgary, asking for censorship of all Canadian reading material. It was decided to appoint a committee to offer co-operation with the Canadian Daily Newspaper Association which is acting in this matter.

Officers elected for the coming year were: President, Miss Mary Amelia Smith, London, Ont.; provincial vice-presidents include, Manitoba, Miss Cecily Cornish; British Columbia, Mrs. Isabel Eccles; Mackay, Alberta, Miss Edna Kelle, reading secretary; Miss Elizabeth Long, Winnipeg.

Miss Laura Allan, of the Wilson Publishing Company, Toronto, was elected to the newly-created office of secretary-treasurer. Judge Emily Murphy was elected historian. Miss Kenneth Hale, of the Irving president, was elected honorary president.

Thinks Immigration Should Be Restricted

President of Canadian Trades Council

Speaks At Toronto Convention
London.—Tom Moore, president of the Trades and Labor Congress of Canada, was one of the principal speakers at a session of the world labor migration congress.

He declared Europe had come to Canada in the past, had worked long hours and had then returned to their homes to spend their earnings. For this reason, the Canadian trades unions were opposed to this kind of exploitation.

Mr. Moore urged restriction of the present unregulated influx of immigrants.

Dr. Kvatt, one of Australia's prominent labor men, declared a great deal of unemployment in Australia was due largely to unrestricted immigration. Australian labor, he said, was especially Italian, who worked for little wages, and retained ideas antithetical to the best interests of labor.

Resumed Air Mail Service

Man Aged Sixty-eight Substitutes For Regular Pilot

Chicago, Ill.—A 68-year-old airplane pilot hopped off from Maywood Field resuming the Chicago and Twin Cities Air Mail Line, which had been disrupted for a day by failure of the regular pilot to report for duty. The 68-year-old pilot was Charles Dickinson, controller, who declared that the temperance of a few youthful pilots could not hold up the air mail to Minnesota.

Ship Recovers Anchor

Part Arthur, Ont.—The steamer, Glenaglen, on its way to New York, lost its anchor and was unable, in a day of diligent search, to recover it. Recently the Glenaglen came into port and dropping its anchor, the ship found it hooked onto the old one, which was thereby recovered.

Will Fight Miners' Leaders

Lord Birkenhead Charges A. J. Cook With Attempt to Blackmail Society

London.—Following closely upon a decision of the Labor party to offer strenuous opposition to the government's new bill which have as their purpose a reorganization of the mines industry, the Earl of Birkenhead, secretary of the House of Lords, delivered a verbal broadside against A. J. Cook, verbal of the miners' federation.

Cook was charged by Lord Birkenhead of aiming at the destruction of the coal mining industry and nationalization of the mines.

Lord Birkenhead said he and his colleagues were fully determined that if they were driven to it by "this attempt to blackmail society by men who declare they have a strategic hold on the vital chords of industry, we shall once more, sorrowfully but resolutely, get ourselves for a great struggle. We shall not permit the nation to be destroyed."

"We, who have broken down every barrier in Europe," Lord Birkenhead declared, "will not be broken down by men who take their biddings from a discredited revolutionary junta in the most poverty-stricken country in Europe."

Swift Current—Over 100 delegates were in attendance at the United Municipalities Association annual convention. Twenty-one years ago the association was created and during the session many congratulations were showered on the officers and the membership for the work it has done during its life.

King Justice Brown of the Court of King Bench, the chief speaker at the opening meeting, sounded the keynote of the work of the association when he spoke of the responsibilities of the thousands of men in the province charged with municipal effort and enterprise. He congratulated the municipalities of the province on having a clearing house for opinions and ideas, and he reiterated the opinion that this particular organization and other engaged in municipal work were part of the foundations upon which the province has been safely and wisely built.

Elevators Practically Cleared

Saskatchewan in Good Shape to Handle New Crop

Regina.—Saskatchewan's elevators are now ready to receive their new crop of grain. The province is in good shape to handle the new crop. Reports incoming at both the Canadian Pacific and Canadian National Railways state that all grain are now practically cleared out and the elevators ready to store up the new crop. Less than 275,000 bushels of all grain now remain in elevators of the Regina division of both railways, many of the points being closed. The 200 bushels. Less than 24 cars of grain are being moved each day from the province going east.

Practically no loading is being done at any points despite the fact that the wheat crop still comes into force on the coast of the province. In 1925 wheat must be in the country elevators and settled for or billed out.

Canada and the League

League of Nations Has Now Cost Canada \$1,500,000

Ottawa.—After stressing the importance and achievements of the League of Nations, Sir George Foster in the senate declared it was the duty of the government to put in the hands of members of parliament each year details of the government's relations with the league. "I have informed the senate each year of the league's work," said Sir George, the correspondence between the government and Sir Riddell, liaison officer at Geneva, should be available to parliament.

Senator Gwynne replied that Canada had spent \$1,500,000 on the League of Nations, and while the league was seven years old, there were more men under arms today than before the Great War. It has not been conducive to peace, he said.

Missing Evangelist Found

Douglas, Ariz.—Positive identification of a woman here as Mrs. Almerie Murphy McPherson, Los Angeles evangelist who was reported drowned there May 18 last, has been made over the telephone by Mrs. Minnie Kennedy, the woman's mother.

On their return from the convention the party will travel through Canada via Canadian Pacific line, stopping at Winnipeg, Toronto and other cities.

Rural Credit Bill
Ottawa.—The government's rural credit bill passed the senate committee on banking and commerce, and now stands for third reading in the upper house.

Compromise On New Flag

South African Government Likely to Accept Suggestion of Labor Party

Capetown, South Africa.—The controversy over the government's proposed new South African flag, the design of which would have excluded the Union Jack, has assumed a new aspect.

The national council of the Labor party a few days ago passed a resolution that there should be equal recognition of two flags, one a symbol of the empire and the other a symbol of South African nationality.

A delegation from the council has now interviewed Hon. Tielman Roos, minister of justice, and the executive of the Nationalist party at Pretoria. The latter have expressed complete satisfaction with the Labor party council's resolution, and moreover have pledged the full support of the Nationalist party to this resolution.

As by means of a pact between the Nationalist and Labor parties the government of Premier Hertzog is in power, the government may accept this compromise.

Locarno Peace Pact

London Is Interested in the Canadian Viewpoint

London.—The debate the Locarno peace pact in the Canadian House of Commons, in connection with Premier Mackenzie King's motion that parliament must pass on treaty matters, are ratified by the cabinet, aroused much interest here.

The Express declares that a useful purpose would be served if all the parliaments of the empire, including the British House of Commons, followed the Canadian example in face of the obligations involved.

RAILWAY RATE CASE IS ARGUED BEFORE BOARD

Regina, Sask.—Suggestions for the removal of the alleged discrimination in freight rates favoring Winnipeg over other prairie distributing points was made to the Board of Railway Commissioners by W. J. McEwen, a spokesman on behalf of the boards of trade of Regina, Yorkton and Moose Jaw. The discrimination was said by counsel to exist in the fact that Winnipeg had the full advantage of a fictitious mileage that was assumed between Port William and Winnipeg, while points "beyond the latter city had the advantage only as far as Winnipeg. These rates were calculated on an actual mileage.

The difference, said Mr. McEwen, in filing comparative statements, means that, on goods shipped from Port William to the time it got to Qu'Appelle the percentage was down to 32, at Saskatoon it was 30 per cent, and at Calgary 44 per cent.

What the province wanted, said Mr. McEwen, was removal of the unjust discrimination. How this was to be accomplished was the time it got to among the various solutions that might be offered that removing the fictitious mileage altogether and setting up a new freight rate structure which would divide the advantage equally among all the prairie points seemed to be the most equitable.

British Rotarians for Denver Convention

Above is a party of British Rotarians on their way to the International Rotary Convention to be held at Denver, June 15-16. The group are seated are: Mr. White, President of the Rotarians, Belfast; J. E. Appleby, Leeds; H. W. Nicolson, Plymouth; J. E. Webb, Truro; J. F. King, Bournemouth. Ladies are: Mrs. C. White, Mrs. Appleby, Mrs. Webb, Mrs. Smith, Miss Coghill, Mrs. Kingston. Back row: J. Smith, Liverpool; Mr. Curry, Dublin; C. Kingston, London; J. Riddell, Doncaster; Edward Williams, Brussels; G. Chateaufort, Doncaster; W. Webb, Plymouth. Seated at back of group is George Wood, chief officer of the Canadian Pacific liner Monarch.

LLOYD GEORGE IS NOT LOOKING FOR LEADERSHIP

London.—Speaking on the "future of Liberalism" at a luncheon of the National Liberal Club, former Premier Lloyd George, Liberal parliamentary leader, kept his audience in raptures of the downward course began when he stepped Mr. Churchill's "mad adventures in Russia," and said frankly, "since then I have touched the depths of my political optimism."

He declared his ambition was not for leadership, but for service, and added: "At the same time, I do not want to say quite finally that I am not going to allow myself to be driven out of the Liberal party."

Allying to Winston Churchill's recent utterance that Lloyd George at the time in the general strike marked the beginning of Lloyd George's downward course, the former premier declared that so far as he could resist the downward course began when he stepped Mr. Churchill's "mad adventures in Russia," and said frankly, "since then I have touched the depths of my political optimism."

Winston Churchill retaliated later in the evening by rebutting Mr. Lloyd George's allegations of "mad adventures in Russia" by stating that the beginning of Lloyd George's downward course, the former premier declared that so far as he could resist the downward course began when he stepped Mr. Churchill's "mad adventures in Russia," and said frankly, "since then I have touched the depths of my political optimism."

Prince Celebrates Birthday

His Apparent Becomes Messages of Congratulation From All Parts of the World

London.—June 23 was the Prince of Wales' thirty-second birthday and were flying throughout the country in his honor. The bunting displays were particularly brilliant in the west end of London. For days the air appeared was inundated with messages of congratulation from all parts of the world. He had luncheon with the other members of the royal family, at Buckingham Palace and a private dinner party for close friends at his own home, York House, St. James' Palace.

Discuss Red Lake Railway

Bill Granting Charter to Private Company Fails to Pass Committee Stage

Ottawa.—For a third time the bill to incorporate the Red Lake and Northern Railway has been "talked out" in the house. Twice a week the first hour after dinner recess is devoted to private bills by routine. At nine o'clock, the bill was brought on for a third time, but it failed to build a road into that mining district, had failed to pass committee stage twice.

B.C. Lumbermen's Wage

Vancouver.—Effective November 1, all men engaged in the lumber industry of British Columbia will receive a minimum wage of 40 cents an hour according to an announcement made by the board charged with administration of the new minimum wage act. Approximately 40,000 persons are employed in these occupations.

Western Financing Methods

Municipalities of Western Canada Are Showing the Way to Those of East

Vancouver.—"Municipalities of Western Canada are showing the way to those of the Eastern Canada in the handling of their finances," declared C. P. Felt, one of Canada's leading authorities on public financing, on his arrival in Vancouver as a member of the Investment Bankers' Association party, which recently held its annual meeting at Jasper Park.

"In British Columbia in particular," he said, "the municipalities have been reducing their debt in actual amount, and the same is true in Saskatchewan. In Eastern Canada, especially Ontario, the reverse tendency is true."

"The provincial governments of the western provinces have also been showing a healthier tendency in the handling of their finances."

About 100 members of the association are spending several days in Vancouver viewing the eastern members' return home. A few of their number, including President H. H. Daly, went north to President from Prince Rupert.

To Settle Vacant Lands

Hudson's Bay Company Will Formulate Immigration Policy

Victoria, B.C.—The Hudson's Bay Company, which owns vast tracts of land throughout Western Canada, is formulating a policy on which to formulating an immigration and settlement policy, it became known here, with the arrival of J. McWhirter, of the company's London, England, office, to confer with E. H. Wilson, land commissioner of the company.

McWhirter explained that the vast possibilities of bringing old settlers from the crowded parts of the British Isles and settling them on the idle lands of Canada were under consideration. He said his present trip was for the purpose of gathering information.

Soldiers' Lands Bill

To Provide For Revaluation of Soldier Settlers' Land

Ottawa.—The bill to provide for the revaluation of soldier settlers' land, which was introduced in the house on June 18, is expected to be passed by the government. The bill provides for the revaluation of soldier settlers' land, which was introduced in the house on June 18, is expected to be passed by the government. The bill provides for the revaluation of soldier settlers' land, which was introduced in the house on June 18, is expected to be passed by the government.

May Be Raised Again

Scarcity of British Ships Affects Rate on Grain Shipments

London.—Rates on grain shipments to the United Kingdom from North and South American Atlantic ports, already increased through the scarcity of British ships in operation owing to the coal mining stoppage, are expected to be boosted again unless there are indications the miners will soon return to work. Rates on shipments from Canada have increased a little less than three cents.

NEARING END OF THE COAL STRIKE IN GREAT BRITAIN

London.—Indications of early negotiations for coal peace were seen in the announcement by Prime Minister Baldwin of postponement for a week of the bill authorizing eight hours of work in the mines. Meanwhile the bill for the reorganization of the mines is being pushed. It is said to be the result of a bargain between the Laborites and Premier Baldwin.

If labor is satisfied with the reorganization bill, it may not be necessary to proceed with the eight-hour bill, as miners may agree to accept a mere reduction in wages for a period rather than an increase in hours.

Herbert Smith, president of the miners' federation, in speech recently declared a wage reduction to be better than an increase of hours. Secretary Cook, of the miners' federation, is still asserting "no penny off, not a minute added," but there are strong indications that the miners are getting tired of Cook, and that a new reduction in wages for a period rather than an increase in hours.

The principal feature of the miners' reorganization bill is amalgamation of the mines.

SAYS WEST IS NOT COMPETING WITH THE EAST

Toronto.—If the bankers of the east and the farmers of the west would get together, the majority of the problems facing industrial Canada would immediately vanish. In the opinion of Hon. J. G. Gardiner, Saskatchewan's financial premier, Mr. Gardiner told the Liberal Association here that the west was not competing in the marketing of wheat with the east, but with the Northern United States, the Argentine and Siberia and for that reason the cooperation of the eastern provinces was to be desired.

Dealing with transportation to the seaboard of western grain, he expressed the hope that some day there would be a direct shipping route from the head of the Great Lakes to Montreal. He looked for a largely increased population in the near future and said that the policy of Western Canada would mean every trade route across the Atlantic Ocean.

Welcomes Famous Flier

New York Gives Turbulent Greeting to Commander Byrd

New York.—Lt. Commander Richard E. Byrd, Jr., leader of the first expedition to fly over the North Pole, upon his return home received a tumultuous greeting in which representatives of the nation, state and cities joined. Thousands of people lined the waterfront at the Battery and lined the sidewalks of Lower Broadway to catch a glimpse of the hero.

Led by two bands, one representing the navy and the other the New York National Guard, the procession started up Broadway.

Prominent among the welcome were members of Lieutenant-Commander Byrd's family. His mother, his six-year-old son, Richard and his wife.

Crowds roared their ovation as the procession moved along the famous thoroughfare at high noon.

Advocates Third Route

Hudson's Bay Railway Will Solve Western Problem Says Premier

Exeter, Ont.—Premier James G. Gardiner, of Saskatchewan, addressing a meeting here, said the farmers of Western Canada are different from those of Eastern Canada.

Yet to be a great country, east and west must work in harmony, he declared. The trade route problem of the western provinces is the cause of many inconveniences to the farmers there. The new Pacific route is solving that problem, yet a third route must be opened by way of Quebec in order to give means of shipping the increasing crops of the prairies. He declared that the government would give every means of shipping to European markets.

Discard Washington

Naval Agreement

U. S. Delegates Amazed At Action Of Experts At Geneva

Geneva.—The essential feature of the Washington naval agreement, namely, comparison of naval strength by the tonnage of different types of warships, was discarded by the naval experts on disarmament to the evident amazement of the United States delegates.

The discussion created a sensation because it affords a threat on confirmation of the principles of the Washington accord.

To Gauge Public Opinion

Bayfield, Ont.—The government is going to canvass public sentiment from one end of the province to the other regarding the Ontario Temperance Act, and when convinced on the proper course to pursue will submit that course to the people. Premier Howard Ferguson said in addressing upwards of 5,000 people assembled here under auspices of the Western Ontario Conservative Association.

Is Appointed Chairman

Ottawa.—The minister of labor has appointed Mr. John Lammont, of Saskatchewan, Minister of Appeals, to be chairman of the Board of Conciliation in the Winnipeg electric dispute. The other members of the board are F. Dixon, of Winnipeg, representing the employees, and J. H. Coyne, of Winnipeg, representing the company.

Following a recent decision, the St. Catharines is to be deepened from 21 to 25 feet, and widened from 125 to 150 feet.

Canada Must Not Relax In Offering Inducements To Settlers From British Isles

The report of the British overseas settlement committee for 1925 shows that little Canada can afford to relax its activity if it wishes to fill its vacant spaces with Old Country stock. Whether it is recognized or not, there is considerable rivalry for these settlers. This country has no content with the charms and the shilling of Australia, and, so far, does not appear to be getting the better of the bargain, says the Toronto Globe.

Last year out of 12,027 persons who left Britain under the overseas settlement scheme, 11,482 came to Canada, Australia got 23,127 and New Zealand 8,801, while 115 went to South Africa. So, if there is a disposition to believe that Canada can sit back in complacency and await the arrival of a new population, even with the advantages and assistance offered, it should not be continued.

Australia is not overlooking any opportunity to get settlers from the British Isles. It is extending just as interesting inducements as this country, and is alert in following them up. Notwithstanding the new rates put into effect in this country—23 to eastern ports, and 29 to British Columbia—its friendly rivalry on the other side of the world are ready to meet us. They have recently undertaken to raise loans to the amount of \$24,000,000 to be supervised, above the various states of the Commonwealth, to assist in settlement. This is expected to provide for the admission of 150,000 immigrants, including 25,000 families within the next five years. And Australia has considerable to offer new arrivals when they come to the various parts of the country which shows the greatest energy and offers the greatest aid is going to get the people; and there is some chafing in the United Kingdom over the restrictions imposed—so much, in fact, that it will be a subject of consideration at the next imperial conference.

With this existing competition the whole question of immigration problem is being solved. The fact that Canada will have to be alive to her interests, but at the same time cannot afford to let down her guard, and she wishes to come, or to go beyond the limits of reason in extending assistance. The country needs people, but the kind who will help themselves when given an opportunity.

The Red-Backed Cutworm

Summerville Method of Control Is Recommended

The red-backed cutworm, which feeds upon a wide range of crops, is the most widely distributed and generally destructive cutworm in Canada. It is a constant hazard to crops in the prairie provinces, and is the most important kind of cutworm in Manitoba and Saskatchewan. In view of these facts the Dominion department of agriculture has issued a new bulletin on the red-backed cutworm and its control in the prairie provinces. It is pointed out in the bulletin that half of the damage caused by cutworms to field crops and sixty per cent. of that to garden crops can easily be prevented if the proper means of control are adopted. No spring-corn crops immune to cutworm injury are known, but fall crops are recommended as a resistant crop. In the bulletin, which may be obtained from the Publications Branch of the Department at Ottawa, the value of poisoned bait, even in fields, is emphasized, and a summerville method of control is also recommended. This consists in encouraging frequently during August and summer to bring weeds under control. Much deeply in midsummer, taking a section of harrow behind the plough, but otherwise leaving the surface as rough as is permissible, with the regard to moisture and conservation. Allow the land to rest and remain unworked until after the first week in September; then cultivate to destroy the weeds. The essential point is to have the furrow closed the period of flight of the moths, from about July 20 to September 5, in order to make the lands unsuitable for egg-laying.

Hint For Beekeepers

Deciding bees with a new type of honeycomb adds greatly to the profits of beekeepers, according to the inventor of the device. By lessening the time needed to manufacture combs, it is said to enable the bees to use the original of honey. Aluminum combs are painted with beeswax.

Time seldom adds to the value of pictures painted by Hope.

W. N. U. 1925

Protein Test For Wheat

Plea Made For Grading of Wheat According to Protein Content
During a discussion of estimates in the House of Commons, John Miller, Progressive, Qu'Appelle, made a plea for the grading of wheat according to protein content rather than by the present standards by which it is measured. He thought the National Council of Scientific Research might do a great service if it investigated this question.

He believed that at present the Canadian wheat did not define fully the virtues by which a really hard wheat should be measured. The protein test, in fact, is a standard in which the grade of grain had been lowered through a slight bleaching, and the lower prices obtained, while the protein content remained the same. He did not suggest that the protein test be the only factor in the grading of wheat, but it should be one factor. The protein test, in fact, is a standard in which the grade of grain had been lowered through a slight bleaching, and the lower prices obtained, while the protein content remained the same. He did not suggest that the protein test be the only factor in the grading of wheat, but it should be one factor. The protein test, in fact, is a standard in which the grade of grain had been lowered through a slight bleaching, and the lower prices obtained, while the protein content remained the same. He did not suggest that the protein test be the only factor in the grading of wheat, but it should be one factor.

Hon. J. A. Robb, minister of finance, said that he would not make a definite thing to bring about. He was not at all sure that wheat producers in Canada might get the entire price premium for protein wheat. However, he was informed that the National Council of Scientific Research had arranged that a committee of that body should consult with the board of grain commissioners on the question of a wider system of protein test in wheat.

Survey of Mineral Possibilities

Saskatchewan Government to Carry on Extensive Investigations This Summer

The Saskatchewan Government will make a complete survey of the mineral possibilities in that province this summer. Investigation of coal deposits and other mineral resources in Lac La Ronge will be made this month by a party in charge of C. B. Hastings, mining engineer and geologist. He will follow up the preliminary survey made by the provincial geologist, who found indications of the existence of high-grade coal in the neighborhood of Lac La Ronge. His recent return from that survey, Professor Worcester reported the outcroppings of coal over an area of about 100 miles long. Off-shore and on-shore were also reported in the Lac La Ronge area.

At the same time another party will go north to Cold Lake, travelling across the Meadow Lake and back to the River, in company with Professor Worcester.

Two tons of imitation pearls were found in Culver City, Cal., in the course of movie addresses in a huge "pearl ball" dance.

The Cattle Industry

Western Progressive Advocates Putting Cattle On the Free List

The real way to assist the cattle industry of Western Canada is to get the United States to remove the duty on or reduce it, G. G. Coote, Progressive member, Macleod, Alberta, told the House of Commons committee on agriculture. Mr. Coote said that certain classes of Canadian cattle were in the United States, and that the closing of the market had been a serious blow to the cattle in Western Canada. He favored putting cattle on the free list, but that it was regarded as impossible at present, he advocated making the Canadian tariff exactly the same as that of the United States with the definite provision that when that country made a reduction, Canada would follow suit. Canada was not afraid of competition from the American cattle, he said.

Colonel H. F. Mullins, Conservative, Marquette, opposed any move which would admit United States cattle to Canada. He feared that they would bring disease, and infect the Canadian herds. The best market for Canadian cattle was in Great Britain, he said.

Hon. R. F. Tolmie, Conservative, Victoria, expressed the opinion that the United States would keep the tariff against Canadian cattle as long as it considered it in their interests to do so.

Mr. Coote stressed the importance of appointing a Canadian trade commissioner at Washington who would be in a position to look after the interests of Canada when legislation affecting this country came before congress.

Eggs Used In Tanneries

Special Mixtures Valuable in First Process of Leather Making

Eggs that are worthless so far as food value goes, are not wasted by the large dealers, but are covered with kerosene after being broken, treated with borax and used to tan leather. The shells are removed by shovels and the egg mixture is placed in a revolving drum with the raw hides to make them pliant. New York World.

Strange Things Happen

Hon. Mr. Robb declared to the Ontario delegation, "The government will still stick to its guns." Now comes the announcement that, because of changes made in the tariff since the Ontario delegation, the tariff on motor cars is to be lowered. Coupling these two statements together, we'd say that Mr. Robb knew the kind of powder to use in those guns.—Exchange.

If there is longer among thieves there should be some among politicians.

Results Of Another World War Would Be To Shatter Foundations Of Civilization

Poultry Industry Is Aid To Population

Also Helps to Build Up More Prosperous Race

"The poultry industry will help to open the tide of population from the country to the city and opens across the border," declared Edward Brown, P.L.S., of London, England, speaking before the Provincial Poultry Association at the Veterinary College in Montreal.

Prof. Brown, who is president of the International Association of Poultrymen in Poultry Husbandry, is making a tour of Canada in the interests of the World Poultry Convention, to be held at Ottawa in the summer of 1926. "The poultry industry will help to build up a better and more prosperous race," he asserted, and showed that would provide a great deal of profit—also employment, especially in Canada where opportunities are endless.

Several thousand delegates representing nearly all civilized countries, are expected to attend the congress, which is the third of its kind. The first took place in The Hague in 1921, the second at Valencia, Spain, in 1924. R. J. C. Stead, director of publicity in the immigration department, declared that the benefits of the congress by no means were confined to poultry interests. The great number of visitors, particularly from Europe, would see in Canada a land where democracy and peace reign, and not a single defective measure necessary to keep harmony. It would also show them two great races with different languages—French and English—living together in like harmony.

Sheep Farming Favored

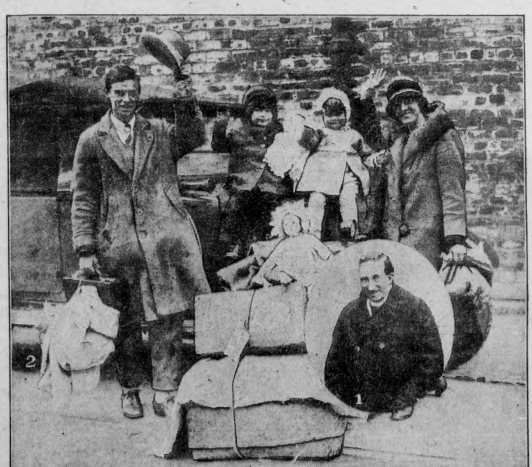

Desirable Form of Agriculture For South-East Section of Alberta

Abandoned farms in the southeastern portion of Alberta are being picked up cheaply by farmers, and it is reported that a favorable eye is being turned on sheep as the most desirable form of agriculture in the district. There is plenty of room for the small bands now on the stock, and the chief concern of the flock owners is to raise enough winter feed for them. Corn appears to be one of the best crops in that direction. Many are planting trees to clear with their fence crops and planning on pasturing them, or using it for hay next year.

Transferring wheat directly into dough without a milling process has been accomplished in France.

Poverty keeps off more cases of gonorrhea than all the physicians care.

New Clan Donald Settler Shows Initiative

One of the most interesting features of the recent general strike in Glasgow was the achievement of the shorter family, native of Birmingham, who arrived recently in Canada on the Canadian Pacific liner Metagama. Mr. Shorter had made arrangements to visit from Glasgow to the strike he was unable to get a train and there were only ten short hours in which to get the boat. The head of the family, having sold his effects in the Old Country, possessed a certain amount of cash. He bought a motorcycle with a side car, bundled his wife and two kiddies, baggage and dollars and all, into the motor, and made the 300-mile trip to Glasgow in eight hours. This left the thrifty Mr. Shorter two hours in which to dispose of the motorcycle, and he did it at a comfortable profit. Commenting on Shorter's accomplishment, Father R. A. Macdonnell, who broke the party out on the Metagama, said it showed a spirit of initiative which would stand the family in good stead in their new venture in Canada. Mr. Shorter shows Father Macdonnell, pioneer of the Clan Donald settlement scheme in Alberta.

Sometimes it seems as though the great tragedy of the Great War had sunk below the horizon of the consciousness of our public men, says the New York Times. Pretty faces, hostilities have over-laid the memory of what happened to Europe and the world after Aug. 1, 1914. Starets thought such criticisms and cautions and anticipated difficulties with regard to the future may be, they shrink to make proper proportions when asked against the possibilities of another world conflict.

In the war the European belligerents lost \$200,000 in killed and wounded, to say nothing of the vast array of crippled and disabled. The United States spent two and a half times as much money as all its previous wars. In addition, the social utilities we disbursed the equivalent of 31 per cent. of the total expenditures of the United States Government from 1781 to 1916. The money cost to Europe was, of course, far heavier. The total has been placed by the federal reserve board at \$100 billion. Experts have reduced this amount to \$50 billion or gold values, of which to billions have fallen to one billion. What does the loss of \$50 billion mean? The nations of Europe? It is equivalent to the entire national wealth of Great Britain, and the entire national wealth of France and Italy. For all the European belligerents the war has been a financial disaster. A quarter of the aggregate national wealth.

What another world war would mean, nobody can tell. There is the certainty of more deadly destruction than there was in the last war. The nations have developed additional lethal poison gases. Experiments are conducted with disease-bearing bombs. There are submarine already in existence with a cruising radius of 16,000 miles, tanks that travel twenty miles an hour, and submarines and aeroplanes intended to submarine. Looked against the food of an entire nation, aerial bombardments on a grand scale looking no account of civilian populations. Heavy guns throwing shells for a distance of 100 miles—it is plain that one can see in the future, war, what the casualties of another world conflict would be.

It is among the high probabilities that the political and social order of Europe, overthrown in Russia by the late war, badly shaken over the rest of the continent, would be unable to resist another catastrophe. The present order will go and in its place will assert themselves the doctrines of Lenin. The people of Europe, overthrown by another calamity like that of 1914, will not stop to balance the costs of war against the costs of communism. Rage and despair will send the people of Europe into the Bolshevik abyss. What that would mean we may conjecture from the Russian revolution in Russia. There the Communist experiment has cost more lives, in a single country, than the total of \$200,000 dead for all the belligerents in the World War. National wealth in present-day Russia it is impossible to estimate. But no unfriendly observers have reported that the Russian people's standard of living is one-half lower than before the war. What the results of a similar experiment in the industrialized nations of Western Europe would be cannot be estimated, but can be summarized. Mr. Keynes speaks of Western Europe, made communism, going down into the pit of death.

Round Up Of Wild Horses

New Staging What May Be Last Event Of This Kind In The West

What may be the last horse roundup is now in progress in the stretch of territory between Medicine Hat and Standard, and between the Bow and Red Deer Rivers. The antelope that are caught are checked over. Those that are useful are kept, those that are not are destroyed. The bands of wild horses have increased in the last few years until they have become a nuisance to the ranchers.

For Tuberculosis Research Work
Hon. J. A. Robb, minister of finance, announced when a vote of \$125,000 for National Research Council was being considered, that the government was undertaking work in the field of tuberculosis together with the federal government from the party out on the Metagama, said it showed a spirit of initiative which would stand the family in good stead in their new venture in Canada.

Safety matches made in Sweden and shipped in America last year weighed 27,000 tons.

About Town and Country

A most enjoyable afternoon was spent by the members of the Junior Sunday School class taught by Mrs. W. T. A. Walker, Miss G. Colwell and Miss R. Walker, at the Walker home, Monday, June 28.

About thirty-two members of these classes met at the Union Church at 4 p.m. and were taken to the Walker home in the care of Mr. G. Morrison and Mr. S. A. Miller.

Various sports were engaged in by the children and prizes awarded the winners of each event.

About 5.30 p.m., the little guests were seated about the festive board which had been placed beneath the shady maple trees.

Aside from the interest in the dairy refreshments, an extra chicken put in its appearance which added to the merriment of the little tots.

At the close of the afternoon, the little guests thanked their hostesses for the delightful party then were taken to the church from which they departed to their respective homes.

Don't forget the Lanfne and Esvel community sports at Lanfne on July 1. Baseball and all kinds of races. Big dance at night with X.L. Orchestra (5 piece) in attendance.

Thousands of tourists are expected to visit the province next month, and to attend the Calgary Stampede from July 3 to 10, and the Edmonton Exhibition, July 12 to 17. In Calgary the annual stampede and exhibition will be staged, while at Edmonton a large historical pageant, celebrating the 21st anniversary of the province, will be produced under expert direction. At both places, the Coldstream Guards Band, a famous British organization will be an attraction.

Sam Hamilton is an Oyen visitor to-day.

The fifth annual picnic of the Fulcras District Association will be held at Fulcras on Wednesday, July 14.

J. W. Allen of Edmonton is a town visitor.

Mr. and Mrs. Gordon Caswell and family left yesterday for Calgary by auto, en route to Banff and Lake Louise, where they will spend a short vacation.

Mr. and Mrs. W. D. Morrell, who were Calgary visitors over the week-end, returned to Oyen yesterday.

Harry Lamont, who has been manager of the branch office of the Canadian Bank of Commerce here (the old Bank of Hamilton) has severed his connection with that institution, and leaves to-day for Calgary.

Big Strides in Sheep Industry

Alberta is making greater progress in the sheep industry than any other province, according to a statement made by W. H. J. Tisdale, assistant general manager of the Canadian Co-operative Wool Growers' Association, in a recent interview. Mr. Tisdale states that the co-operative pool expects to receive some 1,500,000 lbs. of wool from Alberta this year.

Municipal District of Bertawna No. 271

Minutes of Council meeting held at Stibbald, on Saturday, June 5, 1926, at 2 p.m.

Present: Reeve Wilson, Allwood, Daib L. Jones, Norris, and Mowbray.

Minutes of meeting of May 1, approved on motion of Councillor Allwood.

Mr. William Denton made an offer to the Council of \$25.00 for the shack on the N.E. of 21-27-2 West of 4. Allwood: That offer be accepted.

Norris: That all un-enclosed lands owned by the municipality be listed and submitted to the Council at its next meeting.

Allwood: That building on Lot 3, Block 2, be rented to H. M. Ball at a rental of \$10.00 per month, subject to sale.

Jones: That Secretary write to the Attorney General re action to be taken against pedlars selling in the district without a Provincial License.

Allwood: That Pedlars working in this municipality be charged a municipal license fee of \$150.00. Amendment: Jones: That the fee be \$100.00. Amendment carried.

Allwood: That T. Crosswell be charged \$5.00 per month rent.

Allwood: That the Municipal rate on the reduced assessment be 6 mills.

Allwood: That the mill rate on the various school districts be the amount required to cover the estimate according to figures submitted.

Allwood: That 5 venting brands be purchased, 4 inches long, and one be given to each poundkeeper.

Allwood: That the Reeve and Secretary be authorized to borrow \$3500.00 to make the next school payment. And that arrangements be made to obtain the sum of \$2000.00 if necessary for municipal purposes.

Daibel: That the following accounts be paid: G. W. Preston, \$8.00; William Jardine, \$5.00; W. S. Hoover, \$307.00; J. R. Jarret, \$5.00; F. J. Harrison, \$50.00.

Daibel: Adjournment.
F. J. Harrison,
Deputy Secretary Treas.

LEGAL NOTICES

Municipal District of Cereal No. 242

Notice of Impoundment and Sales

NOTICE IS HEREBY GIVEN under Section 88 of The Domestic Animals Act (Municipalities) that one bay gelding, white face, two hind feet white, age about three years, no visible brands. One dapple grey gelding, little white on forehead, little white on hind foot, age about three years, no visible brands. One bay gelding, white face, two white hind feet, left front foot white, age about three years, no visible brands. One dark brown gelding, white face, blind in left eye, age about three years, no visible brands. One bay gelding, white star on forehead, left hind foot white, age about three years, no visible brands. These animals were impounded in the pound kept by the undersigned, Jack McKenzie located on the S.W. 1/4 Sec. 22 Twp. 28 Rge. 4, on the 6th day of June 1926, and that the said animals were sold on the 24th of June 1926, to Franklin A. Cathcart of Marquette, Sask., and that said animals may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due to the municipality and the purchaser of such animals.

For information apply to the undersigned.

J. J. P. Bouchek, Secretary-Treas. Municipal District of Cereal No. 242, Oyen, Alberta.

NOTICE IS HEREBY GIVEN under Section 88 of The Domestic Animals Act (Municipalities) that one bay mare, white spot on forehead, age five years, no visible brands was impounded in the pound kept by the undersigned, Jack McKenzie located on the S.W. 1/4 Sec. 22 Twp. 28 Rge. 4, on the 6th day of June 1926, and that the said animal was sold to Charlie McMurray of Oyen, Alberta on June 24, 1926.

and that said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due to the municipality and the purchaser of said animal.

For information apply to the undersigned.

Here and There

Stormont, the best mine in Nova Scotia, when gold-mining in the province was an industry, is to be re-opened. Until it closed down, twelve years ago, Stormont mine had produced over 570,000 tons of ore, giving an average of free gold of \$4.13 per ton, or \$2,225,000 during its activity.

A record single shipment of Indian motor-cycles, consisting of 85 cases, from Amory, Mass., recently arrived in Tokyo, Japan, having been forwarded by Canadian Pacific Rail and steamer lines. The demand for motor-cycles in Japan is a steadily increasing one, being a cheap and convenient method of locomotion and well suited to the somewhat narrow roads of that country.

Twenty-one British Rotarians recently came over to Canada on the Canadian Pacific liner "Montclair" en route to the International Rotary convention at Denver. On their return trip they came back through Canada, travelling to Winnipeg and Fort William, and taking the Great Lakes trip on C.P.R. steamboats to Port McNicoll. They returned to the Old Country by the C.P. liner "Montclair."

The Canadian Pacific Railway has just added two of the new Mount Class observation cars to these run-ning out of Montreal. Five more are just about ready to run and the balance of four cars will be ready for service shortly after these. They are all-steel cars, made up of three compartments, and one drawing room, and a parlor room with a service platform. They will be a feature of long-run trains on the C.P.R.

The English football team now touring Canada had one of the most strenuous work-outs in the history of any athletic body. Staying for a week-end at the Chateau Lake Louise they had a practice at an altitude of a mile and a half above sea level, where the thinness and dryness of the air had a wonderful effect upon them. Their captain thought it remarkable that prize-fighters in training had not utilized the marvelous properties of this training camp.

Dates for Corn Show

The Directors of the Alberta Corn Growers' Association at a meeting held in Lethbridge last week decided on November 11th and 12th as the dates for the Provincial corn show which is to be held in Medicine Hat. An attractive prize list has been prepared with classes for boys and girls as well as for adults. There has been a larger acreage planted to corn than in previous years and if the season is reasonably favorable strong competition is anticipated.
